

Base from U.S. Geological Survey, variously scaled, 2008
Orthophotography from Indiana University, Indiana Spatial Data Portal, Local Datasets, Marion County, 2007
Universal Transverse Mercator Zone 16 projection
Horizontal coordinate information is referenced to the North American Datum of 1983 (NAD83)

DISCLAIMER: Flood-inundation area boundaries are intended to show the approximate extents of floods using aerial photography as a base map. Error sources in these boundaries can include, but not limited to, digital-elevation-data errors, and hydraulic modeling errors. Errors can result in inaccuracies in flood extent; thus, the flood-inundation area boundaries depicted above should be considered estimates.

Flood-inundation areas for White River near Nora, Indiana (station 03351000), stage of 11.0 feet, 721.5 feet NAVD88.
